Roman Pavers are manufactured to create the appearance of natural stone. They have a natural stone texture that allows them to be used to create driveways, patios and walkways that have a timeless appearance. They look like they've been in the ground for hundreds of years making your project look like original Roman cobblestone.

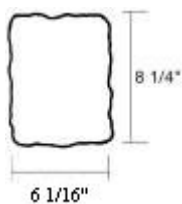

Roman Pavers are rectangular and come in four sizes. They can be installed using one size only in a running or herringbone pattern, or they can be installed by mixing the sizes to create a random cobble pattern. The possibilities are limitless.
